

## **2016-2017 Scholarship Recipient**

*William and Jean Scott Building Fund Scholarship  
James P. Crutcher Endowment Scholarship*

### **James Nosack**

*Senior, University of Washington*

James is working toward his Construction Management degree at the University of Washington. He is an active member in the NECA student chapter, and is a part of the NECA Green Energy Challenge team.

James found interest for the construction industry the summer prior to his freshman year in college. He loves the competitiveness of the industry, how close knit the community is, and how team-oriented a project must be in order to be successful. During the summer of 2014, he worked as a laborer for Nutter Corporation, a road construction contractor. After being accepted into the Construction Management program, he worked over the summer of 2016 as an intern for Prime Electric.

After graduating, James hopes to enter the field as a project engineer either at a general contractor or with an electrical contractor. Long term, he hopes to find his way to an upper management role where he can oversee a department within the company.

In his spare time, James enjoys playing sports, hiking, eating food, and spending time with friends. He hopes to visit Patagonia, Chile, upon other destinations in Europe and South America, directly after graduation.
