

## 2019-2020 Scholarship Recipient

*Mr. and Mrs. Allan F. Osberg Scholarship*

### **Tam Nguyen**

*Senior, University of Washington*

My name is Tam Nguyen and I am currently pursuing my dual degree in architectural design and construction management at the University of Washington. I was born and grew up in Vietnam. In September 2012, after finishing high school, I immigrated to the United States with my parents. I started school as an ESL student at Renton Technical College. After that, I went to Highline College to obtain an AA degree and discovered I would like to work in the construction environment. Then, I transferred to the University of Washington and was accepted to the architectural design program. In my junior year, I became more interested in the building process, so I applied to the construction management program and was accepted as a dual degree student.

This quarter I am very proud to be a part of the design-build studio. We are designing and building the second structure for the Nathan Hale High School Urban Farm. As a dual degree student in architectural design and construction management, I invest a great deal of work into this project because I can gain experience in both design and build aspects.

Last summer, I interned with TGB Architects in Edmonds, WA and learned a great deal about the architect profession. This past summer, I interned with Hathaway Dinwiddie Construction in San Francisco, CA. I will graduate in 2020 and intend to work for a design-build company so I can apply my skills in architectural design and construction management.
